DETAILED ACTION

1. Applicant's election of Group I, Claims 4-6, filed 12/29/03, with traverse, is acknowledged. Applicant argues that "both the compositions and the method of using the compositions are properly examinable together. Even though the pharmaceutical composition maybe tested in *in vitro* assays, the assays would be intended to determine whether the endothelin inhibitor is useful for the treatment of fibrotic disorders.

This argument is not found persuasive for the following reasons. While the searches of products and methods may overlap, they are not coextensive. Particularly note the additional requirement of *in vivo* methods of treatment including considerations such as dosage, concentration and delivery that are not associated with products themselves. Because a showing of noncoextensive searches has been accepted by the Office as a showing a serious search burden on the Examiner, the requirement is still deemed proper and is therefore made FINAL.

Regarding claim rejoinder, where Applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim may be rejoined in accordance with the provisions of MPEP § 821.04. Process claims that depend from or otherwise include all the limitations of the patentable product may be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until all elected product claims are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996).

Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims.

2. Claims 7-12 are withdrawn from further consideration by the Examiner, under 37 C.F.R. § 1.142(b) as being drawn to a nonelected invention.

Claims 4-6 are pending and under examination.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 4-6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Borgeson et al. (1998).

Borgeson et al. teaches a pharmaceutical composition comprising the endothelin receptor A (ETA) inhibitor/antagonist A-127722 (see particularly page 767, column 1, first paragraph, **Methods**). Note that for patentability purposes a new or different intended use lends no patentable weight to a known invention.

The reference clearly anticipates the claimed invention.

5. No claim is allowed.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Gerald Ewoldt whose telephone number is (571) 272-0843.
